

Milo's October Half Term Adventure with Mel

Milo and the children had fun bug hunting.

They found spiders, a last remaining summer butterfly, tiny snails and little ladybirds. We talked about how to handle the little creatures to keep them safe and then carefully transferred them into the magnifying bug box to look at them in more detail. They also viewed them through a magnifying glass.

They counted their legs and talked about the colours of the mini beasts, whether they could fly and where they like to live.

As a treat the children took Milo on a safari to see lots of large mammals and he even got to see a giant pretend spider.

#9 Mini Beasts and Bug Hunting
